

670.6 A55
v.12

Journal of the American Foundrymen's Association.

INDEX. VOL. XII.

NOTE. —During the year the method of paging the JOURNAL was altered to take care of changed conditions. Wherever, therefore, the numbers I, and II, precede the title, reference is made to the first and the second portions of the volume; Part I referring to the early papers, and Part II to the Transactions. The subsequent portion of the volume is covered by the paging given directly and may be located without difficulty.

Accountants Section for Foundry	204
Accounting, Foundry,	258, 371
Acid Proof Castings,	242, 388
Air Furnace and Cupola Reports,	302
Alloys,	296, 452
Alloys, Influence of casting Temperature on,	234
Aluminum Castings,	296
Aluminum, Estimation of,	469
II American Foundrymen's Ass'n, Proceedings at Milwaukee,	3
American Foundrymen's Association, Tests on Cast Iron,	471
American Institute of Mining Engineers, 313, 314, 384, 446	
American Machinist,	
214, 215, 256, 296, 297, 310, 362, 364, 365, 368, 386, 460	
American Society for testing Materials,	
280, 286, 290, 291, 445	
I Analysis as a Help to Melting,	131
II Analysis of Iron, Report on standard Methods for, ..	23
Annealing Cast Iron,	388
Annealing Ovens, Heating,	292
Annealing Ovens, large, for Malleable Castings,	294
I Anodes, Recovery of Nickel from Scrap,	133
I Apparatus for determining the average Silicon in a Mixture,	67
Appliances in the Foundry, Adoption of good,	211

15673
